Green (R)evolution – Action Against Climate Change College Program 2016 - 2017

www.intcce.org/green

**Cause supported by
United Nations Framework Convention on Climate Change - UNFCCC &
United Nations Environment Program - UNEP**

What is Green (R)evolution?

Under the leadership of the Secretary-General, United Nations, governments have advanced international efforts to fight, mitigate and adapt to climate change.

At the Climate Conference (COP) in Cancun in 2010, governments adopted the Cancun agreements, forming the basis for the largest-ever collective effort to reduce carbon emissions and address the long-term challenges of climate change.

Green (R)evolution is an Initiative to Educate, Inspire and Act on Mitigation & Adaptation methods of Climate Change

Reality Check

- 

1. **Carbon dioxide** concentration is 40% higher than in pre-industrial times.
- 

2. **Human activity** caused most of the warming between 1951 and 2010.
- 

3. Earth's surface **warmed 0.85°C** over the period 1880 to 2012.
- 

4. **Heatwaves and heavy rains** have become more frequent since the 1950s.
- 

5. Arctic sea **ice has declined** on average 3.8% per decade since 1979.
- 

6. Global **sea level is expected to rise** between 26 and 82 cm by 2100.
- 

7. Only an **aggressive mitigation scenario** can keep temperature rise below 2°C.

ICCE & United Nations Association

**Cause supported by United Nations Framework
Convention on Climate Change – UNFCCC**

**ICCE is an applicant of The Momentum for Change
Activity which is a recognition system by UNFCCC.**

**ICCE is an official partner with MY WORLD Global
survey for citizens led by the United Nations.**

Global Partners with United Nations GPY2015

What is Green (R)evolution Global Program?

Green (R)evolution - Action against climate change is an initiative by International Centre for Culture & Education (ICCE) cause supported by **United Nations Framework Convention on Climate Change (UNFCCC)**. This initiative is about spreading knowledge on the effects of Climate Change and the actions we can take within our own capacity. It is done through various activities such as global certification programs, campaigns & workshops.

GREEN (R)EVOLUTION

**Global Certification Program
For College Students**

Green (R)evolution Global Certification College Program

Green (R)evolution – Global Certification Program is an International Level Short term course study open for School & College Students.

Green Revolution – Climate Change Program : Rs. 750/-
Advanced Online Program on Global Warming : Rs. 650/-*

Course Material Includes: A5 size illustrated book containing 100 pages and a CD which contains e-books, animations, videos and more
(Advanced Course material will be online)

*Note: Advanced Course only for those who have completed the Green Revolution Climate Change Certification Program

Register: Registrations are ONLY ACCEPTED through an Climate Counsellor's (CC) or Coordinator.

Contact your CC or email us at green.icce@gmail.com

How does the Program Work?

There are 2 Parts to the Program

Knowledge Testing

- Online Exam
- Offline Exam

On-Ground Activity

- Plant-a-Seed (Compulsory)
- Group Activity (Optional)

Program Details

Knowledge Testing: Each Group of Participants can either choose an Online or Offline mode of Exam. The knowledge shared in the book & cd will be assessed in the form of 10 questions. These could be Multiple choice and/or essay type questions.

Note: Participants who do not attempt the exam by the deadline will be considered disqualified and will receive a participation certificate.

On Ground Activity: Every participant need to perform an activity within his/her influence circle.

- i. **Plant-a-Seed (Compulsory):** Plant a seed is an awareness campaign, part of Green (R)evolution Global Program where each participant has to explain the impacts of Climate Change and easy steps that an individual can take within his/her own capacity to fight Climate Change. One such action is to plant the pencil provided to them. Each participant has to promote a minimum of 10 pencils worth Rs. 25/- each, to gain credits in this segment. For more information visit intcce.org/plant-a-seed
- ii. **Group Activity (Optional):** Each group can choose to perform any of the activities listed on our website. Credits will be given to the participant and the group once chosen activity is completed.

Benefits to Participants

International Certification: The Green (R)evolution Global Certificate is Recognized by various International Organizations and Government agencies allowing participants to showcase their contributions towards Actions Against Climate Change.

Access to Best in Class Content: The Material provided to Participants contains the best in class content procured from UNFCCC, The World Bank Institute, NASA & IPCC.

Exposure to Social Activity: Participants are introduced to social actions through the On Ground Activities. It provides a platform to Educate and Influence the society to Act more willingly against Climate Change.

Benefits to Participants contd.

Profile Credibility: The Certification is not only a token of appreciation but proof of involvement. Participants can use these credits to build their profile. Such profiles always have a preference over those who do not contribute to such causes.

Greener Jobs: As the world population swells and climate change puts increasing pressure on the environment, the need for knowledgeable professionals to mitigate damage to the air, land and sea increases as well. Careers in the environmental sector are expanding and market demand for environmental professionals is expected to exceed that of many other professions. The certification will help our participants to aspire for these jobs.

Learning to live an Environmental Friendly Life: The Ultimate reason to participate in the program is to learn to take actions against climate change within the participant's own capacity. Various techniques and activities make the participant learn the best way of living an environment friendly life.
