National Industrial Safety Week: Street Play Demonstration (4th to 11th March, 2017-18)

Organized by

**D. K. Shinde School of Social Work,
CSIBER, Kolhapur**

Dt: 13/03/2018

Objectives of the Street Play:

1. **To Create Awareness about importance of Safety Measures to be followed by the Worker Group**
2. **To Educate the Worker Groups about utilization of safety equipment at the work place**
3. **To Encourage worker groups to follow the safety related instructions at work place**

Description of the Activity

The D. K. Shinde School of Social Work has organized National Industrial Safety Week: Street Play Demonstration from **4th to 11th March, 2017-18 at 25 industrial units** in and around Kolhapur, as Social Responsibility activity of the Institute. The main objective of conducting the Industrial Safety Week in various industrial units is to create awareness of Industrial Safety and Road Safety measure to be followed by the units and Workers groups. The awareness has been created by using Street Play Method. The Students of HR and Labour Welfare Specialization from the department have actively participated in the Street Play demonstration and created awareness among workers groups and industrial units.

The Safety Week activity has been monitored by Dr. K. Pradeep Kumar, Dr. B. N. Patil and Dr. S.V. Shirol.

National Organ & Tissue Transplant

You Have the Power to Donate Life

Organ Donation

A single organ donor can save the lives of up to eight people. Currently over 110,000 people in the U.S. are on the waiting list for an organ transplant. Nearly 1,600 people are on the waiting list for a organ transplant in San Diego and Imperial Counties.

LUNGS

Replace damaged or defective lungs due to conditions such as cystic fibrosis, pulmonary hypertension, emphysema and pulmonary embolism.

HEART

Replace diseased or damaged heart due to conditions such as cardiomyopathy, heart failure, myocarditis and heart disease.

LIVER

Replace diseased or damaged livers due to conditions such as birth defects of the liver or bile ducts, chronic liver conditions or infections like hepatitis.

KIDNEYS

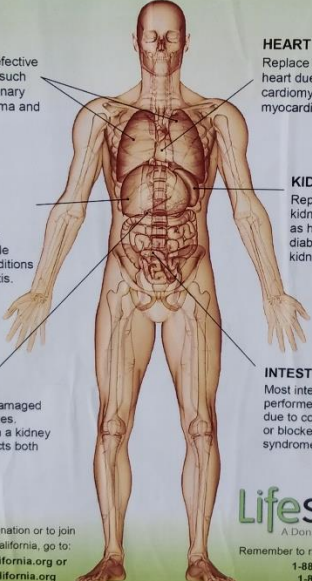

Replace diseased or damaged kidneys due to conditions such as high blood pressure, diabetes and polycystic kidney disease.

PANCREAS

Replace diseased or damaged pancreas due to diabetes. Often transplanted with a kidney because diabetes affects both organs.

INTESTINES

Most intestinal transplants are performed on infants or children due to condition such as twisted or blocked intestines or short-gut syndrome.

Lifesharing

A Donate Life Organization

To learn more about donation or to join the donor registry in California, go to:
www.donateLIFEcalifornia.org or
www.donateVIDAcalifornia.org

Remember to report all deaths by calling
1-888-4A-DONOR
1-888-423-6667

as a kidney or part of Liver, Part of Pancreas but m

As of February 2, 2018 there were 1,15,000 people on the waiting list for an organ transplant. Of these 74,897 People were active candidates who are positive there is large gap between the global level.
