#### **Research Write up**

I had started my research work during my master program to find the issues of Sardar Sarovar Project affected people Rehabilitated at Taloda Taluka in Nandurbar District of Maharashtra. It revealed that rehabilitation was not satisfactory and tribal people experienced problem of life adjustment.

My Joint work as co-Investigator for a minor research project sponsored by the University grants commission, New Delhi under college with potential for excellence program 2009 was on Bhil Tribe in Nandurbar District of Maharashtra: A study from Social work perspective. It found that except education the area such as health, housing, rural development, Agricultural development etc are still have poor growth. The social problems like discrimination, ill treatment and exploitation by non-tribal is faced by tribal.

My doctoral research findings shows that impact of welfare measures is observed in only the sectors of education and health, Whereas the lack of awareness in fundamental constitutional rights, information about developmental schemes. The backwardness in social, economic, social life is far poor compare to non-tribal. As welfare is a multi-dimensional process, it can progressively improve the social, cultural, economic, political, personal and human conditions of the people.

#### **Presented paper on tribal development**

- Endangered life of Tribes due to Development, Displacement and Resettlement
- Minority Communities and forms of Social Exclusion
- Challenges of Rural Development among Tribal
- Role of NGOs in Tribal Livelihood Promotion: A case of MITTRA in Tribal Areas

My area of interest for research is problems of tribal survival, backwardness and development.
